

A dialogue between brass and light.

Designed by the Garmala Studio in Milan, the Aurelius 01 represents a pivotal shift in architectural lighting. It is not merely a fixture, but a conductor of atmosphere.

Each piece is forged from heavy-gauge brass, hand-patinated to achieve a depth of color that evolves with the time of day. The integrated LED array is calibrated to mimic the warmth of a setting sun.

Explore the Process →

Crafted for permanence.

Honest Materiality

Solid, architectural-grade brass with a living finish that patinas beautifully over years of use.

Precision Optics

A custom-engineered diffuser system providing 95+ CRI light for true color representation in any space.

Structural Integrity

Internal reinforcement allows for a seamless, floating silhouette despite its significant weight.

"Light should not just illuminate a room; it should define its soul."

Technical Specifications

Comprehensive data for architects and interior consultants. Every Garmala fixture undergoes rigorous 72-hour stress testing.

Light Output	▼
Nominal Lumens	2,450 lm
Color Temp	2700K - 3200K (Adjustable)
CRI	96 Typical
Dimensions	▼
Certification	▼

COMPONENT	FINISH OPTIONS
Main Body	Aged Brass, Satin Nickel, Matte Black
Glass Element	Clear Fluted, Smoked, Frosted
Cable	Black Silk Flex, Transparent PVC
Ceiling Rose	Matching finish to Main Body
Control	Dali 2.0, Triac Dimming, Smart Connect

Global Logistics

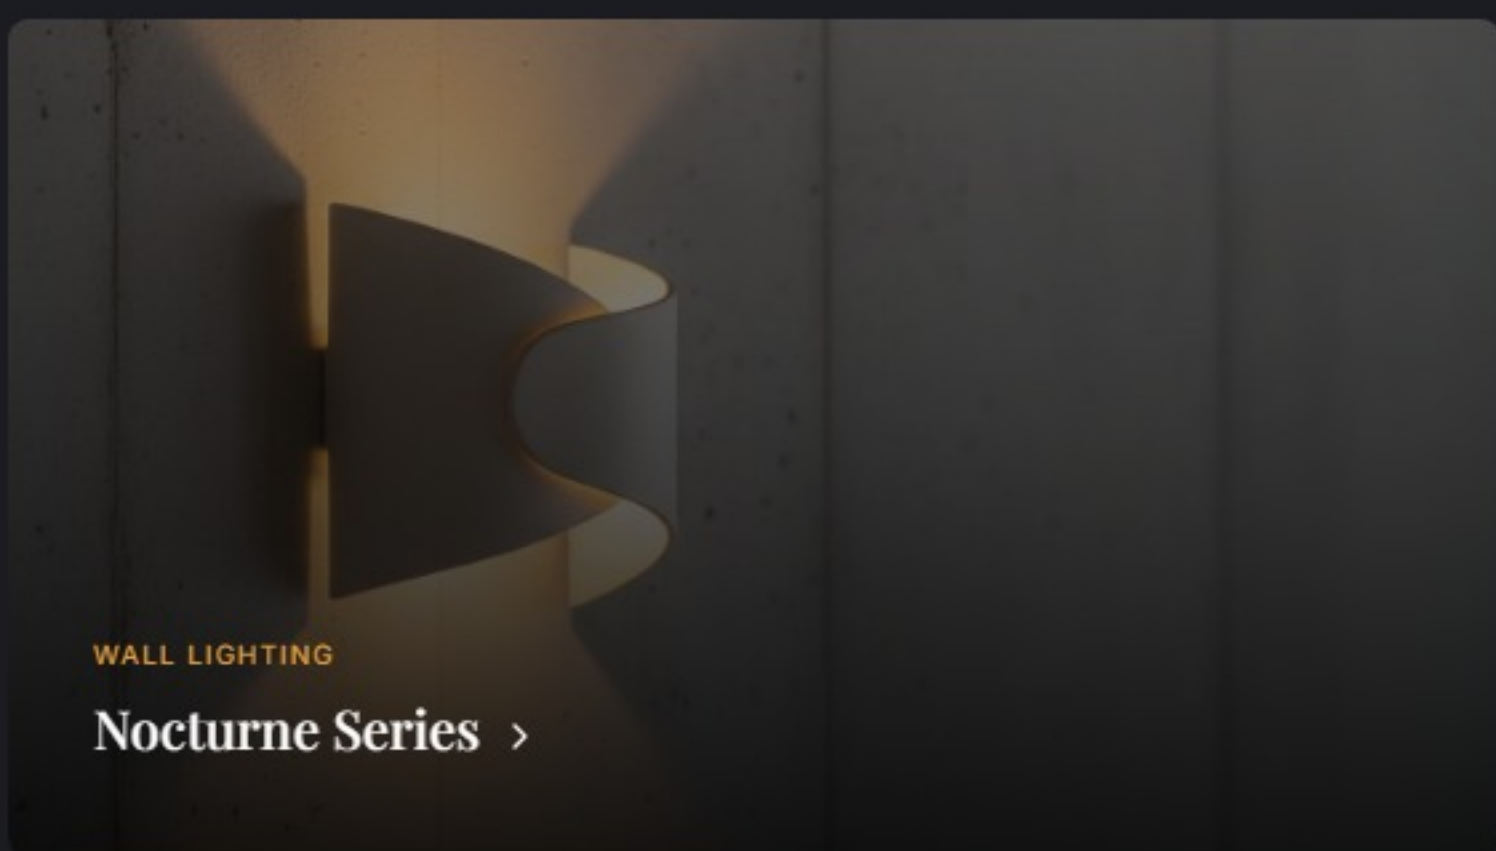

Secure architectural crating with real-time tracking from our Milan studio to your project site.

Trade Program

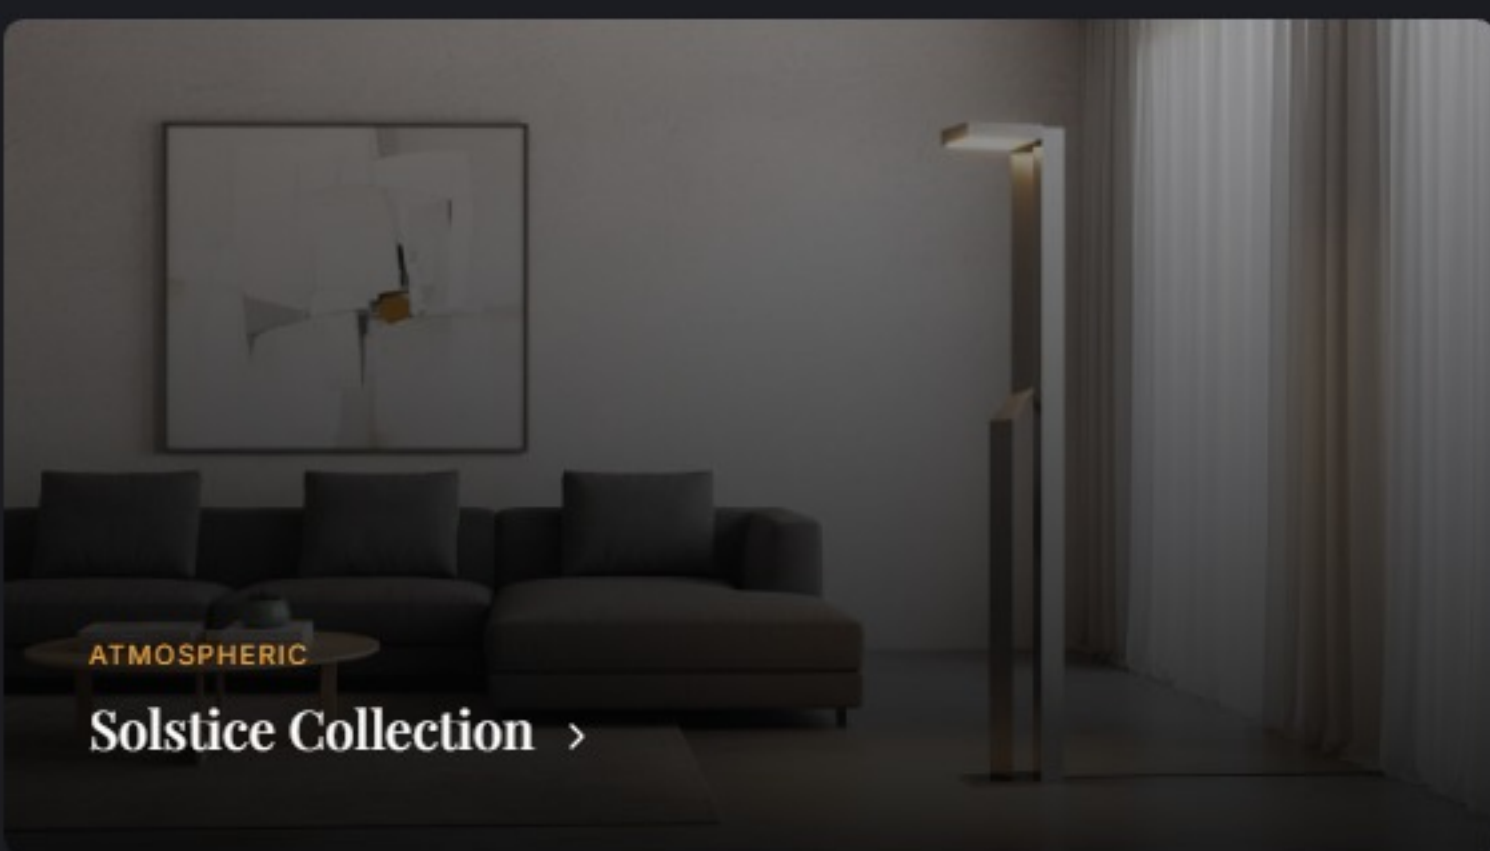

Exclusive pricing and dedicated project managers for registered architectural firms.
